Summary

Game Programmer and Unity Developer with hands-on exposure to 10+ Unity projects, including a 3 published games. Learning and applying C# for gameplay programming — player controllers, state machines, and basic combat/input systems — Currently building practical experience in developing end-to-end gameplay systems through individual and team projects, but eager to grow under mentorship and take on a Game Programmer or Unity Developer role where I can keep learning production-level practices.

Education

Bachelor of Engineering (B.E.), Computer Engineering,
Pacific School of Engineering 🌐

Kadodara, Surat, Gujarat | 06/2023 – 07/2027

Affiliated with Gujarat Technological University (GTU) CGPA: 8.89/10

Projects

Echo: The Paradox 🌐, *Sole Developer*

08/2026

Finalist, STEM Jam | GameDev and Esports Club, IIT Guwahati | Unity 6, C# | Live on [itch.io](https://nathanieal.itch.io/) 🌐

- Developed a first-person narrative game centered around a time-loop paradox, featuring choice-driven gameplay where player decisions directly affect the storyline.
- Developed a custom dialogue editor and choice-driven system, using C# coroutines to manage narrative states.
- Secured 1st place at the STEM Jam finals at IIT Guwahati.

CityScape (Mini City Builder) 🌐, *Unity Game Development Trainee*

07/2026 – 08/2026

Internship project, 1-month internship | Unity 6, C#, JSON Serialization | PC (Windows)

- Developed a hybrid 2D/3D urban simulation game during a 1-month internship, combining strategic city planning with a 3D exploration mode.
- Built a dynamic grid system supporting building placement, rotation, and model handling across the 2D planning environment.
- Integrated JSON serialization for game data and configuration management.

Legacy of Dharma 🌐, *Lead Programmer*

06/2025 – 07/2026

Team project, 4 students + 2 faculty mentors | Unity 6000 (URP), C#, New Input System | PC

- Led programming for a 6-member development team consisting of 4 students and 2 faculty mentors, contributing gameplay systems to a college project.
- Architected the third-person player controller using a custom state machine and Unity CharacterController.
- Implemented script-driven movement and root-motion combat using OnAnimatorMove, along with a horse mount/dismount system using raycast detection.

Skills

Game Development: Unity 3D, Gameplay Programming, Game Mechanics, Level Design, Game Physics, AI

Programming Languages: C#, C, C++, Python, Java

Soft Skills: Problem-Solving, Critical Thinking, Attention to Detail

Tools: Unity Engine, VS Code, Antigravity, Git, GitHub

Certifications & Achievements

S.T.E.M Jam 2026 🌐, *- 1st Place*

08/2026

GameDev Club IIT Guwahati — shipped Echo: The Paradox

Zimension Game Jam 2025 🌐, *- 2nd Place*

09/2025

Runner-up, The Secret Book

SAP Code Unnati Foundation and Advanced Program 🌐

04/2026

Sponsored by SAP and initiative implemented in partnership with the Edunet Foundation

Complete C# Unity 3D Game Development in Unity 6 🌐

08/2025

Udemy Game Development Course provided by Gamedev.tv
